

Remarks/Arguments

Applicants would like to thank Examiner McKinnon for his time during the telephonic interview on Thursday, February 17, 2005. As agreed to in the interview, the Applicants are amending the independent Claims 1, 42, and 84 to include channeling a selectable, non-uniform amount of a first temperature fluid to one or more predetermined locations on the heat exchanging surface. The Applicants are also adding new Claims 124-246, including independent Claims 124, 165, and 207. The independent Claims 124, 165, and 207 are substantially the same as the previously presented independent Claims 1, 42, and 84 with the addition of the limitation that the heat exchanging surface corresponds to one heat source. During the interview, the Examiner indicated that the amendments above to the independent Claims 1, 42, and 84, and the limitations added in new independent Claims 124, 165, and 207 would overcome the cited prior art.

For the reasons given above, the Applicants respectfully submit that the claims are in a condition for allowance, and allowance at an early date would be appreciated. If the Examiner has any questions or comments, he is encouraged to call the undersigned at (408) 530-9700 so that any outstanding issues can be expeditiously resolved.

Respectfully submitted,
HAVERSTOCK & OWENS LLP

Dated: February 22, 2005
